Image is representational.
Actual design may vary.

The AIM Cushion is a pressure redistributing cushion that allows for superior comfort and stability. It's unique design provides an air fluid multi-zone simulation. It is ideal for sedentary patients who continually sit at home for extended periods of time. It can be used on multiple seating surfaces, does not require a solid surface. Great for recliner use. Short-term and long-term success consistently result in improved clinical outcomes. The AIM Cushion is self adjusting, auto-inflating and Maintenance free.

- No pump required
- Can be used on multiple seating surfaces. Does not require a solid surface.
- 100% American made
- Great for recliner use
- Ideal for sedentary patients who continually sit for extended periods at home.
- Maintenance free
- Removable, washable cover
